DESCRIPTION

Full Stack Developer skilled in HTML, CSS, JavaScript, Node.js, Express and MongoDB. Collaborative team player with a passion for continuous learning and staying current with industry trends.

WORK EXPERIENCE

RED STAG LABS

20 Mar 2022 - PRESENT

Esoft (**RED STAG LABS**)

- Build and update user-friendly web apps using React, Redux, HTML, CSS, and MUI with guidance.
- Create scalable APIs using Express.js.
- Work with teams to connect APIs to backend systems.
- Fix issues found by QA testers.
- Evaluate competitor websites for ideas.

CERTIFICATES

Marvel Minds

10 Feb 2023 10 Mar 2023

Full stack development course

PROJECTS

FB clone using html , css and bootstrap 5 (**MARVEL MINDS**)

E-commerce website front end using react.js , redux tool kit , MUI and integration of fake store api (**MARVEL MINDS**)

Weather App. It uses the weather API. Redux is used for storing the state. It shows the forecast weather up to 5 days. Tech Stack: HTML, Tailwind CSS, React, GIT

Goal setter I have developed an application using React.js for the frontend. For state management, I utilized RTK, ensuring efficient handling of application data. In the backend, I employed Express.js, leveraging MongoDB as the database to store and manage application data and auth. system
